Review: On February 25, 2016 my healthy 48 year old son died from the flu. This terrible event sent me in search of knowledge about the virus. The search led me to this book. The book is well researched, yet the key element that makes the book readable is the narrative about the state of medical science, medical schools and their evolution at the start of the...

Description: In the winter of 1918, at the height of WWI, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four weeks than AIDS has killed in twenty-four years, more in a year than the Black Death killed in a century....
